| Step | Description | | | | | | | illustration | | | | | | |
| 1 | lde | Identify the grille & hardware with parts list. | | | | | | | | | | | | |
| 2 | Insert the bumper billet into the factory bumper opening. | | | | | | | | | | | | | |
| | blao tha Wit the | ck squa t are w h a 3/1 tab m | elded to 6 ″ drill | with the s the back bit insert mall marl | mall hole side of th ed throug | e the 2 sm in the cent e billet grill h the hole blastic of th | in | | | | | Ŧ | | |
| 3 | Now remove the billet and drill a hole through the bumper plastic where you just made the small mark. Make sure to drill the hole through the aluminum plate behind the plastic factory bumper insert. Reinsert the billet into the bumper opening and insert the two machine screws through the billet bars, the small black tab with the hole in it and the factory bumper plastic. | | | | | | | | | | NV I | | | |
| 4 | From behind the bumper install the 1 ["] black fender washers and the nylon lock nuts and tighten. You can reach behind the bumper from underneath the vehicle, you may need to unclip the rubber splash guard to gain access to the backside of the bumper. | | | | | | | | | | | | | |
| 5 | Ма | Make sure the billet grille is centered and tighten the fasteners.but do not over-tighten. | | | | | | | | | | | | |
| 6 | Rei | Reinstall the black plastic cover which was removed | | | | | | | | | | | | |
