 Drill
 Cut

Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Optional: pop hood, remove the black plastic cover (on top of OEM grille) from vehicle. If you are still unable to access the rear, remove the grille shell according to factory manual.	
3	Insert the Studs into the weld tab hole from front side of the billet grille.	<div style="display: flex; align-items: center;"> <div style="border: 1px solid black; padding: 5px; margin-right: 10px;"> picture for reference only; this is not actual grille </div>  </div>
4	Hold the billet grille against the OEM grille shell, center and mark (2) holes for drilling. Remove billet grille and drill holes according to your mark.	
5	Center the billet grille onto the OEM grille. Press & insert the toggle nuts on to the rear of the OEM grille through the gap. Move to (2) drilling holes, thread a screw in each nut welded to the grille. Secure billet grille using the clip nuts from the back side of the grille shell.
