Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Optional (for vehicles with black plastic cover under hood), pop hood, remove the black plastic cover (on top of OEM grille / front panel) from vehicle. This will allow access to the rear of the grille shell. If you are still unable to access the rear, remove the grille shell and reattach after installation.	
3	Place the bumper grille into the bumper opening.	
4	Mark where the mounting tabs line up on the bumper vertical bars.	
5	Place the two bracket clips on the vertical plastic bumper supports. You may need cinch down on the brackets so they clip onto the vertical bars. See Fig1&2.	
6	Place the screws through the front side of the bumper grille, and into the bracket clip holes. Secure the billet from the underside of the vehicle using the kep nuts. See Fig 3.

7	Make sure the billet grille is centered and tighten the fasteners, but do not over-tighten.
8	Reinstall the black plastic cover which was removed in step 2.
9	Installation completed!!!

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
