	2	Tabs	2		4	Screws	4	#8 x 3"
Install Notes: Overlay <input checked="" type="checkbox"/> Replacement <input type="checkbox"/> Drill <input type="checkbox"/> Cut <input type="checkbox"/>								
Step	Description				illustration			
1	Identify the grille & hardware with parts list.							
2	Remove the grille from the box. Test fit the grille to make sure that it fits in the bumper shell properly. Make sure the grille is centered.							
3	Attach clip nuts on the tab, make sure the small hole on the clip is pointing at the opposite direction from the tab bending angle.							
4	Place screws through the welded tabs on the back of the grille, and attach a tab on the end of each screw. Rotate the tab so it is vertical and secured behind the bumper shell. You may use a screwdriver or any tool handy for you for rotation. Tighten the screws, but not over tighten.							
5	Installation completed.							

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
