06-07 Ford F-150 Wire Mesh Bumper Grille

Hardware

-- Use factory hardware

Note: Instruction for billet grille also applies to stainless steel grille.

- (1) Open the hood to gain access to the backside of the bumper opening.
- (2) Remove the three factory nuts directly below and behind the face of the bumper. Set aside as they will be reused later.
- (3) Place the wire mesh grille behind the bumper opening and the mounting points on the grille will go over the factory studs where the nuts were removed in step 2.
- (4) Position the upper mounts of the wire mesh grille between the bumper and the bumper brackets. This will lock the wire mesh grille into place.
- (5) Install the factory nuts that were removed in step 2 holding the lower wire mesh grille mounts into place.
- (6) Make sure that the wire mesh grille is centered to your liking and secure all hardware.
- (7) Installation is now complete!!!

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
