Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Remove the five plastic fasteners holding the radiator cover in place. Remove the cover. Remove the screws holding the grille to the vehicle. Separate the black center from the outer grille shell using a Phillips screwdriver.	
3	Center the billet insert behind the grille shell opening. The four mounting tabs welded to the rear of the billet insert align with factory mounting holes. Use the factory screws to secure the billet to the shell.	
4	Fasten the small hole in the 'L' bracket to the mounting hole in the center of the grille shell on top. Reinstall the grille assembly onto the vehicle.	
5	At each end of the assembly, fasten two screws to the factory mounting holes.	
6	Make sure the billet grille is centered and tighten the fasteners.	
7	Reinstall the black plastic cover which was removed in step 2.	
8	Installation completed!!!	

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
