Install Notes: Overlay [×]   Replacement [√]   Drill [√]   Cut [√]

Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Pop hood, remove the black plastic cover (on top of OEM grille / front panel) from vehicle. This will allow access to the rear of the grille shell.	
3	Attach 4 L brackets to welded tabs on the rear of the grille with (4) 8# Screws and (4) 8# U-clip nuts as shown.	
4	The cross bars in the bumper opening can be removed from the bumper opening but is not necessary. Cut the cross bars out of the opening if desired. File the edges smooth.	
5	Center the billet insert in the bumper opening. Make a note where the mounting L brackets on the billet insert align to the bumper opening. Remove the billet insert. Slide a 10# U-clip nut over the rear edge of the opening at each mounting L bracket. Hold the billet insert firmly in place. Using a drill gun and extended Phillips bit. Install the (4) 10# screws through the U-clip nuts and into the plastic bumper opening.	
6	Make sure the billet grille is centered and tighten the fasteners, but do not over-tighten.	
7	Reinstall the black plastic cover which was removed in step 2.	
8	Installation completed!!!	

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result.
Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation.
We are not responsible for any damage caused by the installation. Thank you for choosing our product!
