| 1       | Identify the grille & hardware with parts list.   |                    |             |         |  |      |         |    |     |             |
| 2       | Open the hood and remove the four black plastic rivets that secure the top of the grille shell.   |                    |             |         | To remove the plastic rivets, use a flat head screwdriver pry up on the center, then lift out the whole rivet. |      |         |    |     |             |
| 3       | Pull back the top of the grille shell and locate the two lower corner clips. Release these clips by squeezing the top and bottom tabs together and pull the grille shell forward. Once the corners are released, carefully pull the grille shell off the vehicle. |                    |             | 34      | Side View  |      |         |    |     |             |
| 4       | From the back of the grille shell, use a phillips head screwdriver to remove the emblem. Use the screws you just removed to attach the stock emblem to the new grille.  |                    |             |         | Side View  Stock Grille  |      |         |    |     |             |

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result.

Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
