Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Optional (for vehicles with black plastic cover under hood), Pop hood, remove the black plastic cover (on top of OEM grille / front panel from vehicle). This will allow access to the rear of the grille shell. If you are still unable to access the rear, remove the grille shell and reattach after installation.	
3	Slide a U-nut over each 'J' hook as shown in the diagram below. Center one of the inserts in the bottom opening. Hold the insert in place and install a screw from the front. From the rear install a 'J' hook. Tighten the screws to hold the insert in place. Repeat on the remaining three inserts.	
4	Make sure the billet grille is centered and tighten the fasteners.	
5	Reinstall the black plastic cover which was removed in step 2.	
6	Installation completed!!!	

The instruction here is for your reference only. You may need to bend the grille a little bit to adjust to fit. We strongly recommend the professional installer for best result. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
