	2	U-Clip Nuts	4	8#	4	Truss Socket Tapping Screws	4	8×1"

Install Notes: Overlay

Replacement

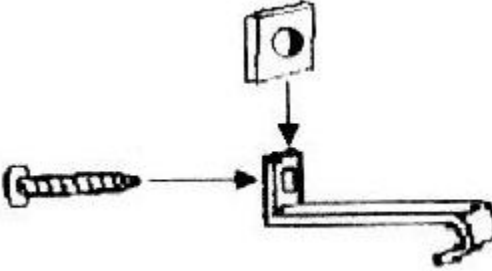

Drill

Cut

Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Pop hood, remove the black plastic cover (on top of OEM grille / front panel) from vehicle. This will allow access to the rear of the grille shell.	N/A
3	Center the billet over the opening with the shortest bar on top. Note the tabs welded to the rear of the insert. Remove the insert. Slide the U-clip nuts over the end of the 'J' hooks. From the front, insert a screw into each top tab on the billet insert. Start to thread both screws into the 'J' hooks (the top two only) as show below. Now place the billet insert over the opening. Wrap the ends of the 'J' hooks over the factory cross bar.	
4	Now insert a screw into the lower tabs on the insert. Carefully wrap each 'J' hook under the bottom factory cross bar and thread onto each screw. Hand-tighten all the screws. Make sure the insert is centered. Loosen the hardware and adjust if needed.	N/A
5	Make sure the billet grille is centered and tighten the fasteners.but do not over-tighten.The billet must be removed if the factory bumper tow hooks are going to be used.	N/A
6	Reinstall the black plastic cover which was removed in step 2.	N/A
7	Installation completed!!!	N/A

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
