Install Notes: Overlay Replacement Drill Cut

Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Open the hood and remove the factory plastic radiator cover and grille assembly. Now remove the factory grille shell; use a small screwdriver to pull the center from each fastener. Do not discard the fasteners. Release the four molded clips along the bottom of the grille. If installing a bumper insert; install at this time; then proceed to Step 3.	N/A
3	Install the top mounting plate to the grille using the nuts and washers. Use the remaining nuts and washers to attach the mounting brackets to the bottom. Point the mounting clips towards the top.	N/A
4	The top plate and mounting brackets align to the factory holes. Center the grille in place. Slide the lower brackets in place (1). The grille should rest flush to the bumper cover opening. It may be necessary to slightly bend the lower brackets so the grille sits flush to the bumper cover. Remove the grille and adjust if needed. Use the factory fasteners to secure the top mounting plate. Re-install the radiator cover using the factory fasteners.	
5	Make sure the billet grille is centered and tighten the fasteners. but do not over-tighten.	N/A
6	Reinstall the black plastic cover which was removed in step 2.	N/A
7	Installation completed!!!	N/A

The instruction here is for your reference only. You may need to bend the billet grille bars or tabs a little bit to adjust to fit. We strongly recommend the professional installer for best result. Please use masking tape and tape the OEM grille shell along the edge to protect your vehicle during installation. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
