Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Optional (for vehicles with black plastic cover under hood), pop hood, remove the black plastic cover (on top of OEM grille / front panel) from vehicle. This will allow access to the rear of the grille shell. If you are still unable to access the rear, remove the grille shell and reattach after installation.	
3	Center the billets over the openings. They will fit only one way.	
4	Remove the inserts. Note the tabs welded to the rear of the inserts. Take one billet and insert a screw into each tab from the front and a 'J' hook/ Nylon lock nuts. Re-center the billet over the mesh in the bumper opening. From the rear of the bumper, thread both Nylon lock nuts onto the screws.	
5	Make sure the billet grille is centered and tighten the fasteners, but do not over-tighten.	
6	Reinstall the black plastic cover which was removed in step 2.	
7	Installation completed!!!	

The instruction here is for your reference only. You may need to bend the grille a little bit to adjust to fit. We strongly recommend the professional installer for best result. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
