Step		Description				illustration			
1	Iden list.	Identify the grille & hardware with parts list.							
2	Start with the upper section. Open hood and remove 3 screws, pull turn signals forward (may be very tight). Remove lens. Press fingers down on stock fasteners, pull forward under lower outer headlight with snap fastener; pull out until shell is released. Tape off chrome area, so no scratches in shell; always lay shell on soft clean surface.								
3	Trim lower and sides of stock grill at base of stock bars; at the top keep ¼ of bar that stock mount is located from (see picture 1). Mark from chrome trim back 5/8 inch from bottom and sides of shell, trim shell (see picture 2), saving center mount.								
4	appr edge allov	(See picture 3) Drill hole in cross of side ports, trim out cross bars of shell from back side, sand outer edge approximately 1/8 inch remaining from outside use straight edge, sanding remaining edge down till straight edge touches 5/8 inch main opening to 1/8 inch outer opening. Factory supports in shell may need trimming to allow grill to rest flush with sides of center opening and end opening at the same time. (Recommend you take your time to insure grill sits well in openings.)

12

Application 2001-2004 Toyota Tacoma

10 Move on to the lower section. Remove the license plate from the vehicle. Center the billet in the bumper opening.

Center the billet in the bumper opening. The two tabs welded to the rear of the insert align with the two outer vertical bars in the opening. Make sure the insert is straight and mark the holes in the tabs to the bars. Drill a 1/8"hole at each mark. Fasten using the screws and nuts.

13	Make sure the billet grille is centered and tighten the fasteners. Re-install the license plate if desired.
14	Installation completed!!!
