Install Notes: Overlay  Replacement  Drill  Cut

Step	Description	illustration
1	Identify the grille & hardware with parts list.	
2	Optional (for vehicles with black plastic cover under hood), Pop hood, remove the black plastic cover (on top of OEM grille / front panel) from vehicle. This will allow access to the rear of the grille shell. If you are still unable to access the rear, remove the grille shell and reattach after installation.	
3	Place billet grille in the center of the shell.	
4	Place each screw into welded tabs of the billet grille and through shell's reseal, place tab and nut, then tighten each nut.	
5	Set the top billet grille in the top of factory grille, be sure to place it in the center of the shell.	
6	Place a Phillips head screw in each of the two welded tabs of the billet grille place a tab behind the grille shell in line with were the screw comes through. Tighten each of the screws evenly so as not to put the grille in a bind and not to make it go off center. DO NOT OVER TIGHTEN SCREWS.	
7	Repeat steps 3 and 4 for the bottom grille.	
8	Reinstall the black plastic cover which was removed in step 2.	
9	Installation completed!!!	

The instruction here is for your reference only. You may need to bend the grille a little bit to adjust to fit. We strongly recommend the professional installer for best result. We are not responsible for any damage caused by the installation. Thank you for choosing our product!
