STEP 1

Start the installation under the driver side of the vehicle. Locate the 8 plugs along the bottom edge of the body. Mounting Brackets will bolt to the 1st, 3rd, 4th and 6th threaded mounting holes, (**Fig 1-6**). Remove the plastic plugs from each mounting location. Directly above each threaded insert is the top mounting location on the side of the body panel. Hold a Mounting Bracket up in place to help determine the mounting locations.

NOTE: Thread an M8X1.25-30mm Hex Bolt into the threaded inserts to clear paint as required.
