STEP 1

Start the installation under the passenger side of the vehicle. Locate the 6 plugs along the bottom edge of the body. Mounting Brackets will bolt to the 1st, 3rd, 4th and 6th threaded mounting holes, **(Fig 1)**. Remove the plastic plugs from each mounting location. Directly above each threaded insert is a top mounting location on the side of the body panel. Hold a Bracket up in place to help determine the mounting holes to use along the body.

NOTE: Thread an 8mm Hex Bolt into the threaded inserts to clear paint as required.
