## STEP 1

Start installation from the driver side front of the vehicle. Locate the plastic plugs along the bottom edge of the body, **(Fig 1)**. Remove the plastic plugs from the front mounting location. Directly above each threaded insert is a top mounting location on the side of the body panel. Hold a Bracket up in place to help determine the correct mounting holes to use along the body.

**NOTE:** Thread an M8 Hex Bolt into the threaded inserts to clear paint as required.
